1928.

THE NEW ZEALAND JOURNAL OF AGRICULTURE.

VOLUME XXXVII.

(July – December, 1928.)

INDEX.

A.

Acidity in cheesemaking, slow development of, 305.
Adamson, N. J. — The orchard (monthly notes), 200, 275, 415.
Afterbirth or cleansing, retention of, 32.
Agricultural clubs, boys' and girls', 317.
Agricultural interests in relation to statistics, 398.
Agricultural legislation of 1928, 294.
Agricultural Research Conference, Imperial, 1927, 179.
Agricultural shows, season 1928–29, 218, 290, 357, 424.
Almond varieties for cross-pollination, 68.
Amphistome worms in cow's stomach, 142.
Animal-manures, importation of, 290.
Annual sheep returns as at 30th April, 1928, 286.
Answers to inquiries, 68, 142, 216, 288, 358, 432.
Apiary, the (monthly notes), 57, 133, 206, 280, 342, 420.
Apples, Dunn's and Cox's Orange, cracking of, 85.
Apples and pears exported, varieties of, 70.
Apples and pears export guarantee and regulations, 1929 season, 352.
Arrowtown fruit-testing plot, 48.
Aston, B. C.—
  Mineral content of pastures—
    Lime-deficient areas and a hitherto unsuspected malnutrition disease of sheep, 146.
    Examination of some Wairarapa district samples, 242.
    Farming of bush-sick country, 410.
Atkinson, Esmond—Weeds and their identification: Tutsan, 408.
Ayrshire heifers at Ruakura Farm of Instruction (photograph), 71.

B.

Basic slag, examination of, 362.
Barley, seed, hot-water treatment of, 185.
Bacillus subtilis, 305.
Bearing trouble in pregnant ewes, 216.
Blown cows, treatment of, 359.
Books received, 137.
Bordeaux and lime-sulphur sprays: Comparative test in Canterbury orchard, 124.
Bovine parturient eclampsia, 239.
Boys' and girls' agricultural clubs: Taranaki and Wanganui district competitions, season 1927–28, 317.
Braxy-like disease and fluke in sheep: Successful control work reported from Hawke's Bay, 37.
Breeding of Romney-cross sheep: The Wallaceville wool-improvement demonstration, 86.
Broken crockery and glass for poultry, 217.
Brown, F. C. — Poultry-keeping (monthly notes), 54, 131, 203, 278, 342, 418.
Bush-sickness treatment, 192.
Butter and cheese gradings, season 1927–28, 139.
Butter-factories: Leading average grades, 196.
Butterfat figures from herd-test and factory returns: Some causes of variation, 396.
Butter: Testing for water content, 272.
Bush-sick country, farming of, 410.
Bulb blooms for market, growing, 432.

C.

Campbell, J. A.—
  Testing of fruit-tree stocks, 34.
  Cracking of Dunn's and Cox's Orange apples, 85.
Calf-feeding time at Ruakura State Farm (photograph), 215.

Careless dipping of sheep, 161.
Casein, manufacture and export of, 322.
Cereal diseases in New Zealand, survey of, 89.
Cereals and potatoes, estimated areas under, 362.
Certification of seed potatoes: Final certificates issued in Canterbury, 214.
Certification of seed potatoes: Information gained from first year's working of scheme in Canterbury, 8.
Checking of milk and cream tests at factories, 72.
Cheesemaking, slow development of acidity in, 305.
Cheese-factories: Leading average grades, 196.
Christofleau method of electro-culture, the, 192.
Cider-manufacture, 351.
Citrus-culture: Variety and rootstock experiments at Tauranga, seasons 1926–27 and 1927–28, 187.
Citrus-culture (monthly notes), 54, 130, 203, 277, 341, 417.
Cleansing or afterbirth, retention of, 30.
Clubs, boys' and girls' agricultural, 317.
Club-root and fertilizers, 359.
Cockayne, L.—Review: Plant Hunting, 64.
Copper carbonate dust treatment for seed wheat: Otago farmers' experience, 35.
Common ailments of live-stock and their treatment, 30.
Competitions, farmers' field, 268.
Concentrates, feeding of, to dairy cows, 262.
Contagious abortion, 30.
Cook, J. G.—Breeding of Romney-cross sheep: Wallaceville wool-improvement demonstration, 86.
Corrections, 67, 139, 434.
Corticium disease of potatoes, 385.
Cows, blown, treatment of, 359.
Cracking of Dunn's and Cox's Orange apples: Investigation in Nelson District, 85.
Cream-grading, 401.
Cream, the production and grading of, 378.
Crockery and glass, broken, for poultry, 217.
Crop areas and yields, seasons 1926–27 and 1927–28, 433.
Crow garlic and its control: Study in Waikato district, 93.
Cinnabar moth and ragwort control, 170.
Curle, J., and Morgan, G. F. V.—Slow development of acidity in cheesemaking: *Bacillus subtilis* shown to be a common cause, 305.

D.

Dairy cows, testing of purebred (C.O.R. lists), 62, 347, 425.
Dairy Division—Testing of purebred dairy cows (C.O.R. lists), 62, 347, 425.
Dairy factories in New Zealand, 1928, 72.
Dairy-farming inquiries, 289.
Dairy-farming in Auckland and Taranaki, 291.
Dairy-herd testing in New Zealand: Review of 1927–28 season, 219.
Davey, M.—
Orchard irrigation by mobile pipe system, 118.
Utilization of pigs in commercial orchards, 394.
Davies, J. E., and McGillivray, R.—Gore Experimental Area operations, 1927–28, 120.
Dayus, C. V.—Bovine parturient eclampsia, 239.
Deem, J. W.—
Farmers' field competitions: Taranaki and Wanganui districts, season 1927–28, 268.
Waimate West Demonstration Farm: Notes on operations for year 1927–28, 332.
Deficiency diseases in sheep, treatment of, 432.
Dehorning of young cattle, 358.
Dempster, W.—The production and grading of cream, 378.
Dipping, mortality among sheep following, 251.
Duck-rearing, 204.
Dunn's and Cox's Orange apples, cracking of, 85.

E.

Earp, E. A.—The apiary (monthly notes), 57, 133, 206, 280, 342, 420.
Eclampsia, bovine parturient, 239.
Economics, rural: An analysis of dairy-farming in Auckland and Taranaki, 291.
Eggs export: Conditions of Government guarantee for 1928 season, 138.
Electro-culture, the Christofleau method of, 192.
Ensilage for calves, 359.
Ensilage and pasture management: The trench silo, 299.
Establishment of beneficial insects in New Zealand: Summary of recent work under Agriculture Department, 193.
Estimated areas under cereals and potatoes, 362.
Estimates of the season's lambing, 434.

Everett, P.—
Strawberry-growing in New Zealand, 97.
Citrus-culture: Variety and root-stock experiments at Tauranga, seasons 1926–27 and 1927–28, 187.
Ewes, bearing trouble in, 216.
Export of apples and pears, 1929 season: Conditions of Government guarantee and export regulations, 352.
Export of eggs, 1928 season: Conditions of Government guarantee, 138.
Exports of New Zealand produce for year ended 30th June, 1928, 144.

F.

Farm dairy instruction, 218.
Farmers' field competitions: Taranaki and Wanganui districts, season 1927–28, 268.
Farming of bush-sick country: Some further recommendations, 410.
Farm-killed mutton and pork: Guidance for hygienic examination of carcasses, 392.
Farm, the (monthly notes), 50, 126, 198, 273, 335, 412.
Fawcett, E. J.—Rural economics: An analysis of dairy-farming in Auckland and Taranaki, 291.
Feeding of concentrates to dairy cows: Economic data from local experiments, 262.
Fertilizers and phosphate rocks, reputed, 434.
Fertilizer importations, 214, 431.
Field competitions, farmers', 268.
Figs, non-maturing, 216.
"Finest" grade of butter and cheese, 186.
Fluke and braxy-like disease in sheep, 37.
Foot-rot in sheep, 166.
Fruit-testing plot, Arrowtown, 48.
Fruit-tree stocks, testing of, 34.
Frost-prevention for orchards: Heating experiments and methods in Central Otago, 19, 106.
Fundamental grassland research: Scheme of experimentation initiated by Department of Agriculture, 1.

G.

Garlic, crow, and its control, 93.
Gill, D. A., and McGregor, P.—Laurel poisoning of stock, 407.
Gore Experimental Area: Notes on operations, season 1927–28, 120.
Gorse, spray for killing, 288.
Gradings of butter and cheese, season 1927–28, 139.
Grading of export butter and cheese: Leading dairy-factory averages for year 1927–28, 196.
Grasses and clovers for hill country: Ratstail, 229.
Grass-grub parasite, 194.
Grassland research, fundamental, 1.
Grasslands of New Zealand, the: Grasses and clovers for hill country, 219.
Gum-tree weevil parasite, 194.

H.

Hadfield, J. W.—
Certification of seed potatoes in Canterbury, 8.
Potato-culture, 73, 152, 254, 309.
Herd-testing in New Zealand: Review of 1927–28 season, 219.
Herd-testing, official, of purebred dairy cows, 1927–28, 162.
Hewlett, C. E.—Hot-water treatment of seed barley: Field experiments in Canterbury, season 1927–28, 185.
Hill country, deteriorated, improvement of, 308.
Hopkirk, C. S. M.—
Braxy-like disease and fluke in sheep, 37.
Hydatid disease: Its cause and prevention, 372.
Horse, mouthing of, 433.
Horticulture Division — Arrowtown fruit-testing plot, 48.
Horticulture (monthly notes), 58, 134, 209, 282, 345, 422.
Hot-water treatment of seed barley: Field experiments in Canterbury, season 1927–28, 185.
Hudson, A. W.—
Turnip-manuring investigations, 245.
Potato-manuring experiments in Canterbury, season 1926–27, 323, 402.
Hydatid disease: Its cause and prevention, 372.
Hyde, W. C.—Horticulture (monthly notes), 58, 134, 282, 422.

I.

Imperial Agricultural Research Conference, 1927: Official report of the New Zealand delegates, 179.
Importation and keeping of wool rabbits, 49.
Importation of animal-manures, 290.
Inquiries, answers to, 68, 142, 216, 288, 358, 432.
Insects, beneficial, establishment of, in New Zealand, 193.
Insects for noxious-weeds control, 253.
Interim return of sheep, 1928, 61.

Interim returns of live-stock, 37, 67.
International seed-testing, 391.
Introduction of mulberry varieties, 36.
Inventions of agricultural interest, 65, 218, 428.
Iodine, feeding of, to farm animals, 288.
Irrigation of orchards by mobile pipe system, 118.

J.

Japanese walnut, the, 143.

K.

Kea subsidy, the, 195.
Kerrigan, J.—Unthriftiness and mortality among lambs and hoggets: The past season's experience in Canterbury, 167.
Kidson, E. — Weather records (monthly), 66, 140, 212, 284, 360, 430.
Killings at meat-export works, 362.

L.

Lambing, estimates of the season's, 434.
Lambing, the season's: North Island estimate, 362.
Lambs, death of, from suspected docking infection, 358.
Lambs and hoggets, unthriftiness and mortality among, in Canterbury, 167.
Lambs, mortality among, 217.
Lambs, "pulpy-kidney" disease of, 117.
Laurel poisoning in stock: A case of deaths among calves, 407.
Legislation, agricultural, of 1928, 294.
Lemon variety and rootstock tests, 187, 188.
Levy, E. Bruce—
Fundamental grassland research, 1.
The grasslands of New Zealand: Ratstail, 229.
Lice-infested sheep, sale of, 316.
Lime-deficient areas, 146.
Lime-sulphur and bordeaux sprays: Comparative test in Canterbury orchard, 124.
Live-stock, common ailments of, and their treatment, 30.
Live-stock Division—
Farm notes, 337.
Estimates of the season's lambing, 434.
Live-stock, interim returns of, 37, 67.
Live-stock in New Zealand, 1928, 429.
Lowe, C. E.—Tobacco-culture: Simple instructions for small growers, 171.
Lucerne-growing in mid-Canterbury: Some experiences at Ashburton Experimental Farm, 386.
Lukey, E. J.—Mortality among sheep following dipping, 251.
Lyons, J.—Common ailments of live-stock and their treatment, 30.

M.

Manures, importation of animal, 290.
Mammitis in dairy cows, prevention and treatment of, 337.
McKay, J. G.—Lucerne-growing in mid-Canterbury: Some experiences at Ashburton Experimental Farm, 386.
McIlwaine, J. E.—Farm-killed mutton and pork: Guidance for hygienic examination of carcasses, 392.
McGregor, P., and Gill, D. A.—Laurel poisoning in stock, 407.
McGillivray, R., and Davies, J. E.—Gore Experimental Area: Notes on operations, season 1927–28, 120.
Meat-export works killings, 362.
Metritis, septic, 33.
Milk and cream tests, checking of, at factories, 72.
Milking, methods of, 143.
Miller, D.—
Establishment of beneficial insects in New Zealand: Summary of recent work under Agriculture Department, 193.
Piripiri control: An insect parasite, 49.
Mineral content of pastures—
Lime-deficient areas and a hitherto unsuspected malnutrition disease, 146.
Examination of some Wairarapa district samples, 242.
Morgan, G. F. V., and Curle, J.—Slow development of acidity in cheese-making: *Bacillus subtilis* shown to be a frequent cause, 305.
Mortality among sheep following dipping: Experience in Canterbury, 251.
Mouthing of young horse, 433.
Mulberry varieties, introduction of, 36.
Munro, H.—Pasture top-dressing by motor-lorry, 376.
Mutton and pork, farm-killed, 392.

N.

Neill, J. C. — Survey of diseases of cereals in New Zealand, 89.
Nitrogenous fertilizing and rotational grazing of pastures: Experiment in Piako County, season 1927–28, 363.
Noxious weeds orders, 18, 217.
Nurseries, plant, registration of, 283.

O.

Official herd-testing of purebred dairy cows: Survey of the first season's work, 1927–28, 162.
Orange varieties and stocks, experiments with, 190.
Orchard heating for frost-prevention, 19, 106.
Orchard irrigation by mobile pipe system in Marlborough, 118.
Orchard, the (monthly notes), 52, 128, 200, 275, 415.

P.

Parakeets, Rosella, 137.
Paralysis in pigs, 359.
Parasitic control of woolly aphis, 105.
Parasites, insect, 193.
Pasture management and ensilage: The trench silo, 299.
Pastures, mineral content of, 146, 242.
Pasture top-dressing by motor-lorry: Demonstration at Ruakura State Farm, 376.
Pasture top-dressing experiments in South Otago: Results of two-year plots, seasons 1926–27 and 1927–28, 182.
Pasture top-dressing experiments in Otago, season 1927–28, 38.
Paton, W. N. — Statistics and their relation to agricultural interests, 398.
Paynter, L.—Bordeaux and lime-sulphur sprays: Comparative test in Canterbury orchard, 124.
Pears and apples exported, varieties of, 70.
Pear-midge parasite, 193.
Piripiri control: An insect parasite, 49, 88.
Pig industry investigations, 144.
Pig-management, 261.
Pigs, utilization of, in commercial orchards, 394.
"Plant Hunting" (review), 64, 139.
Poisoning in animals, cases of, 298.
Poisoning of stock by laurel, 407.
Pope, F. S. — Agricultural legislation of 1928, 194.
Pork and mutton, farm-killed, 392.
Potatoes and cereals, estimated areas under, 362.
Potato-culture—
The maintenance of pure and vigorous crops, 73.
Descriptions of some of the more important varieties, 152, 254, 309.
Poultry-keeping (monthly notes), 54, 131, 203, 278, 340, 418.
Potato-manuring experiments in Canterbury, season 1926–27, 323, 402.
Potatoes, seed, certification of, 8.
Potato selection, 83.
Potato, variation in the, 81.
Production and grading of cream: Practice on farm and at factory, 378.
"Pulpy-kidney" disease of lambs: A new theory, 117.

R.

Rabbit nuisance, the, 238.
Rabbit-skins, export of, 290.
Rabbits, wool, importation and keeping of, 49, 72.
Ragwort control and cinnabar moth, 170.
Ragwort, effect of, on silage, 216.
Ratstail for hill country, 229.
Reputed fertilizers and phosphate rocks, 434.
Reviews—Plant Hunting, 64, 139.
Rice, W. H.—Citrus-culture (monthly notes), 54, 130, 203, 277, 340, 417.
Ringworm, treatment of heifers for, 289.
Romney-cross sheep, breeding of, 86.
Rosella parakeets, 137.
Rotational grazing and nitrogenous fertilizing of pastures: Experiment in Piako County, season 1927–28, 363.
Rural economics: An analysis of dairy-farming in Auckland and Taranaki, 291.

S.

Seasonal notes (monthly), 50, 126, 198, 273, 335, 412.
Seed potatoes, certification of, 8.
Seed samples, referee, 304.
Seed-testing, international, 391.
Seed wheat, copper carbonate dust treatment for, 35.
Septic metritis, 33.
Singleton, W. M.—
Official herd-testing of purebred dairy cows: Survey of the first season's work, 1927–28, 162.
Dairy-herd testing in New Zealand: Review of 1927–28 season, 219.
Sheep, careless dipping of, 161.
Sheep, interim return of, 61.
Sheep leg-lice, control of, 288.
Sheep, lice-infested, sale of, 316.
Sheep maggot-flies and their control, 68.
Sheep maggot-fly parasite, 193.
Sheep, mortality among, following dipping, 251.
Sheep returns, annual, 1928, 286.
Sheep-skins, removing of wool from, 69.
Sheep, treatment of deficiency diseases in, 432.

Shows, agricultural, 218, 290, 357, 424.
Smallfield, P. W.—The farm (monthly notes), 50, 126, 198, 273, 335, 412.
Smith, J. M.—Boys' and girls' agricultural clubs: Taranaki and Wanganui district competitions, season 1927–28, 317.
Slow development of acidity in cheesemaking: *Bacillus subtilis* shown to be a frequent cause, 305.
Statistics and their relation to agricultural interests, 398.
Stock in New Zealand, 1928, 429.
Stocks, fruit-tree, testing of, 34.
Stratford, G.—The orchard (monthly notes), 52, 128.
Strawberry-growing in New Zealand, 97.
Stud stock, export of, 151.
Subtilis, bacillus, 305.
Sudan grass, 289.
Survey of diseases of cereals in New Zealand, 89.

T.

Te Kauwhata wattle plantation, 211.
Temperature of wax for coating cheese, 375.
Tennent, R. B.—
  Copper carbonate dust treatment for seed wheat, 35.
  Pasture top-dressing experiments in Otago, season 1927–28, 38.
  Pasture top-dressing experiments in South Otago, 1926–27 and 1927–28, 182.
Testing butter for water content, 272.
Testing of fruit-tree stocks, 34.
Testing of purebred dairy cows (C.O.R. lists), 62, 347, 425.
Tobacco-culture: Simple instructions for small growers, 171.
Tobacco-culture (monthly notes), 58, 134, 210, 346, 422.
Top-dressing pasture by motor-lorry, 376.
Top-dressing experiments on pasture in South Otago, 182.
Top-dressing experiments on pasture in Otago, season 1927–28, 38.
Top-dressing of dairy pasture, 69.
Tomato crops, protection of, from frost, 116.
Tomato-house, heating of, 142.
Trench silo, 299.
Tung-oil trees, 142.
Turkeys, ridding, of worms, 68.
Turnip-manuring investigations: Review of recent experiments and outline of future work, 245.
Turnips, manuring of, 289.
Tutsan as a weed, 408.

U.

Unthriftiness and mortality among lambs and hoggets: The past season's experience in Canterbury, 167.
Utilization of pigs in commercial orchards: A Marlborough experience, 394.

V.

Varieties of apples and pears exported, season 1928, 70.
Vegetables, protection of, from small birds, 70.

W.

Waimate West Demonstration Farm: Notes on operations for year 1927–28, 332.
Water for butterwashing, 411.
Walnut, Japanese, 143.
Warts on cow's teats, 143.
Wattle plantation, Te Kauwhata, 211.
Wax, temperature of, for coating cheese, 375.
Weather records, 66, 140, 212, 284, 360, 430.
Weeds and their identification: Tutsan, 408.
Weeds, insects for control of noxious, 253.
Weed flora, survey of, 346.
Weight of sheep and lamb carcasses exported, 141.
Wellington winter show, 141.
Wheat research, 105.
Wild, G. W.—
  Crow garlic and its control, 93.
  Ensilage and pasture management: The trench silo, 299.
  Nitrogenous fertilizing and rotational grazing of pastures: Experiment in Piako County, season 1927–28, 363.
Williams, W. R. L.—Frost-prevention for orchards, 19, 106.
Wing-thistle, occurrence of, 358.
Wilson, R. A.—Butterfat figures from herd-test and factory returns: Some causes of variation, 396.
Woolly aphis, parasitic control of, 105.
Wool-improvement demonstration at Wallaceville Laboratory farm, 86.
Wool-rabbit farming, 72.
Wool, removing of, from sheep-skins, 69.
Worms, amphistome, in cow's stomach, 142.
